

As **Welding specialist / Welding engineer (m/w/d)**

you are responsible for the welding equipment in the company as well as the professional supervision and further development of the welding personnel.

Your tasks include:

- Actively shaping the design of jigs and welding systems and responsible for planning and implementation of new projects
- Responsible for ensuring and improving the quality of the manufactured assemblies
- Carry out internal and external acceptances of manufactured individual parts, assemblies and components with regard to their execution in accordance with drawings and standards.
- Creation of welding instructions and welding planning documents and consistently monitor compliance with applicable welding regulations

We are looking for a committed personality with the following profile:

- Graduate in mechanical engineering or technician with several years of professional experience in the metalworking industry
- Comprehensive knowledge of welding technology, ideally supplemented by the additional qualification of welding engineer/technician
- Very good written and spoken English
- Sound knowledge of MS Office
- Independent, structured and careful way of working as well as strong implementation skills

Your benefits at Binder:

We offer you a responsible and holistic position in an innovative company with flat hierarchies. You will work in a environment with long-term prospects for professional and personal development. We offer you a performance-related salary as well as additional benefits such as company pension scheme, bicycle leasing and in-house canteen.

Exactly yours? Apply now, stating your starting date and salary expectations!
